

# How to install Kaspersky Anti-Virus 2018

1. Double-click the downloaded file. You can download Program latest version as link

[http://www.icom.co.th/kaspersky\\_thai/Download/kav18.0.0.405en-my\\_full.exe](http://www.icom.co.th/kaspersky_thai/Download/kav18.0.0.405en-my_full.exe)

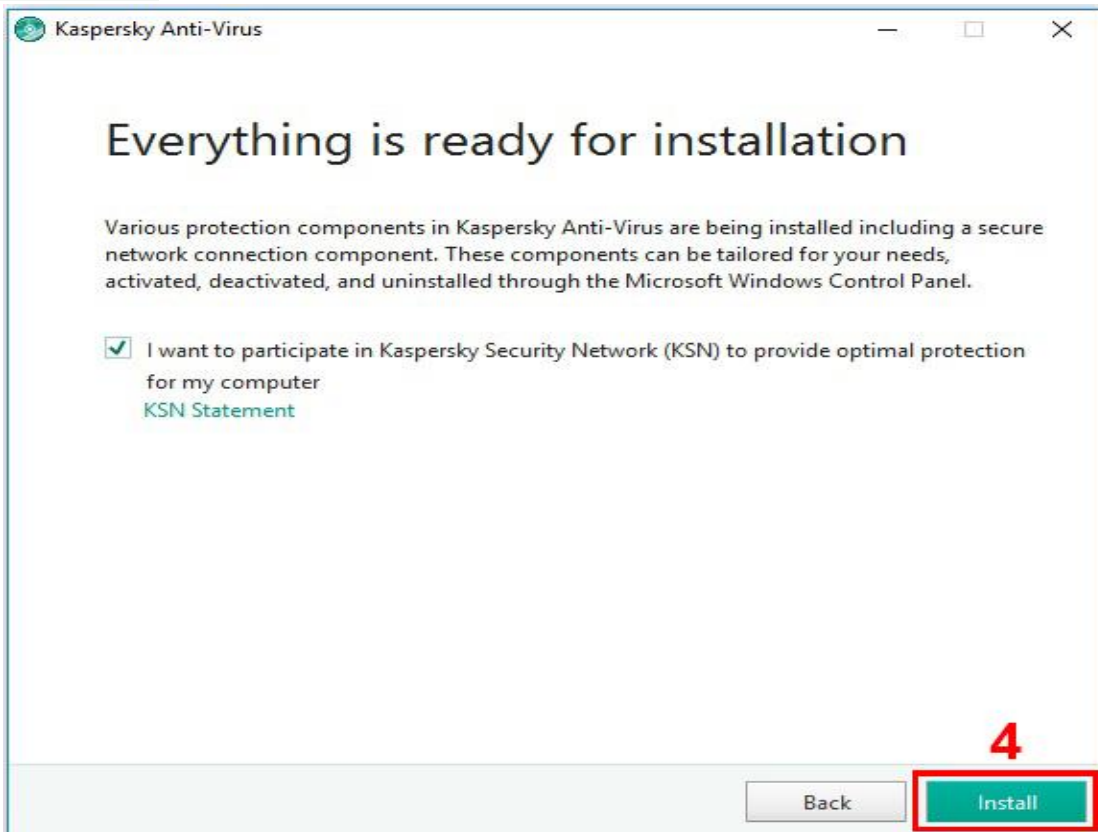

2. Click **Run**

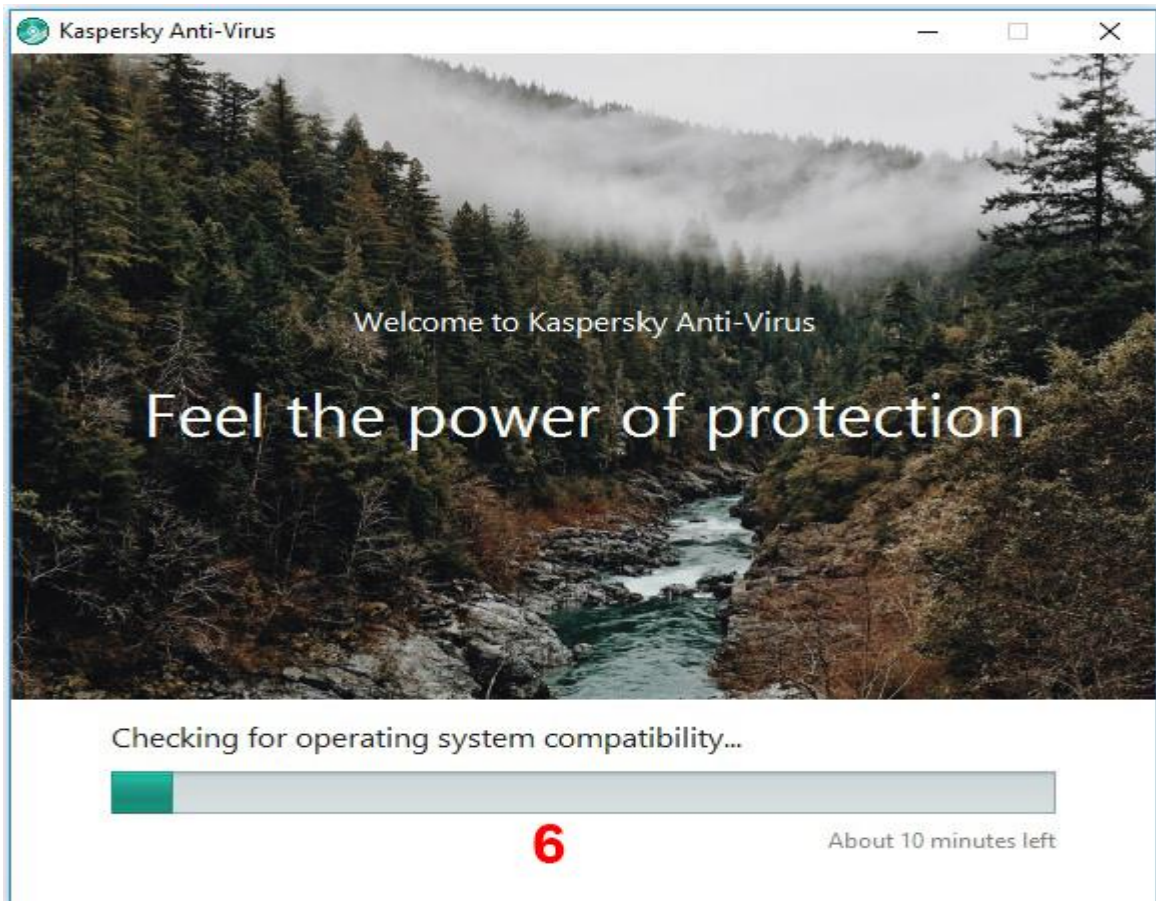

3. Click **Continue**

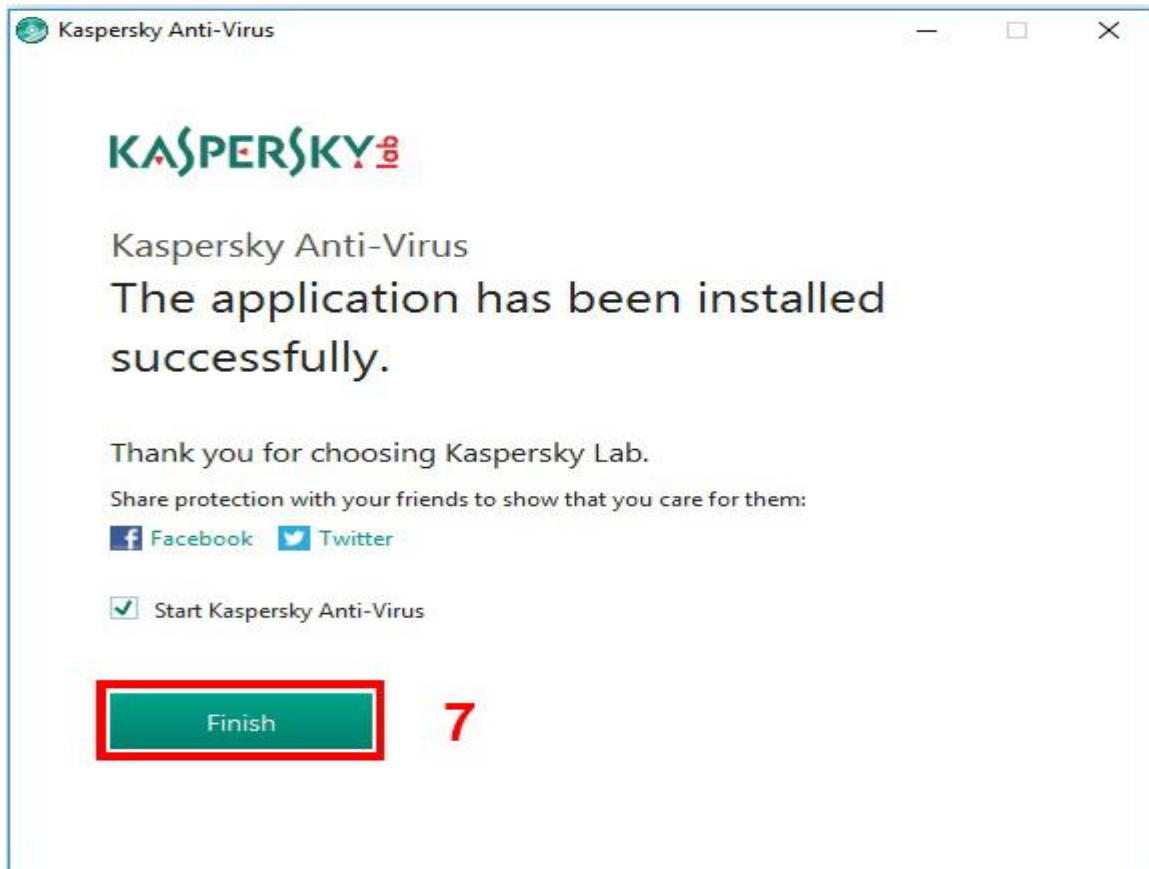

4. Click **Install**.

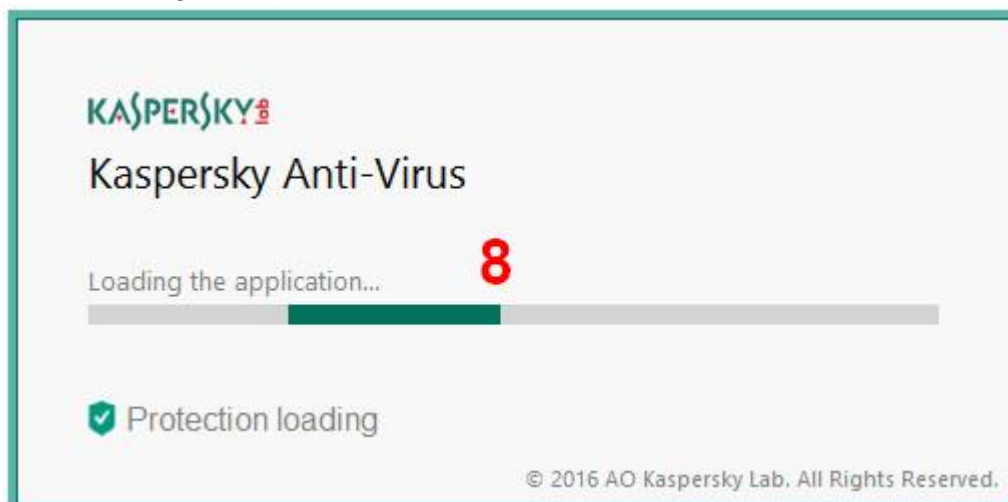

5. If you are installing the application under Windows 8, or Windows 10, you may see a notification from the **User Account Control (UAC)** service after you click the Install button. To proceed with the installation, enter your administrative password and click **Yes** in the **User account control** window.
6. Wait for the installation to complete

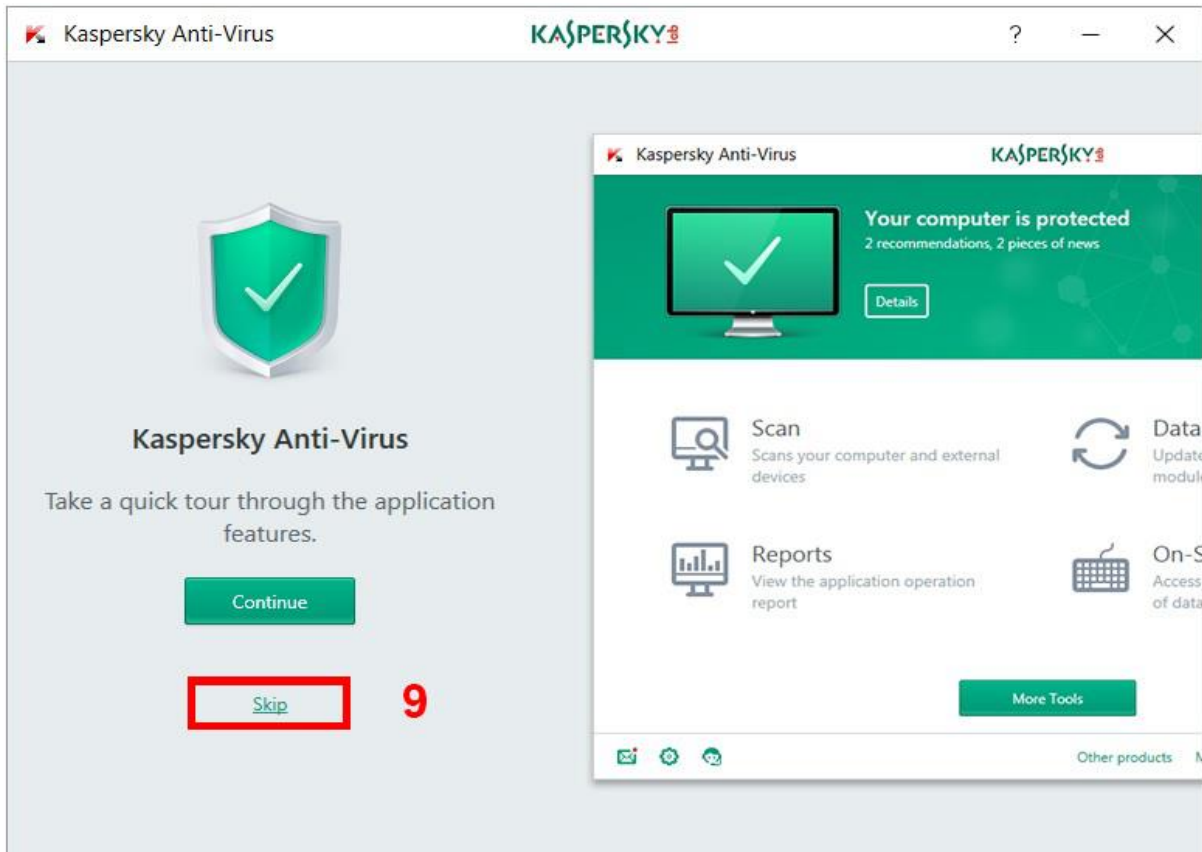

7. Make sure that the check box **Run Kaspersky Anti-Virus** is selected and click the **Finish** button to complete the installation.

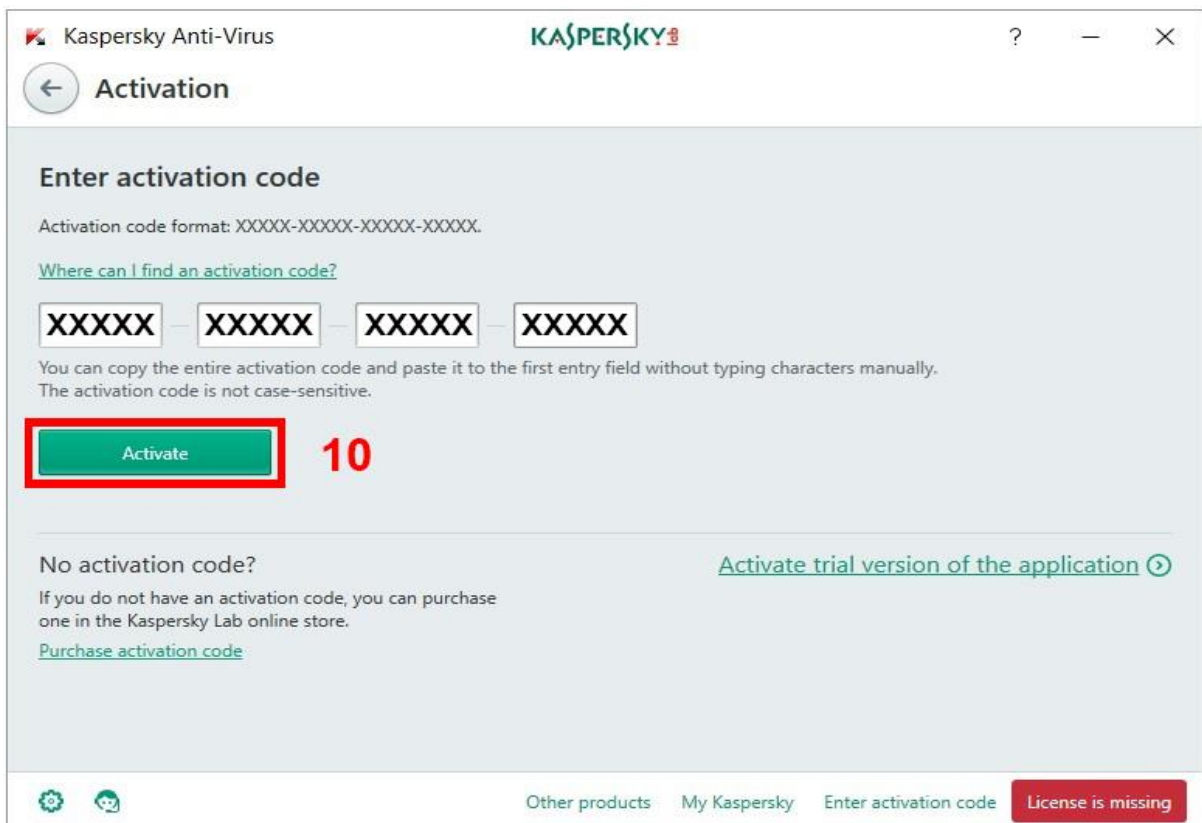

8. Wait for loading the application

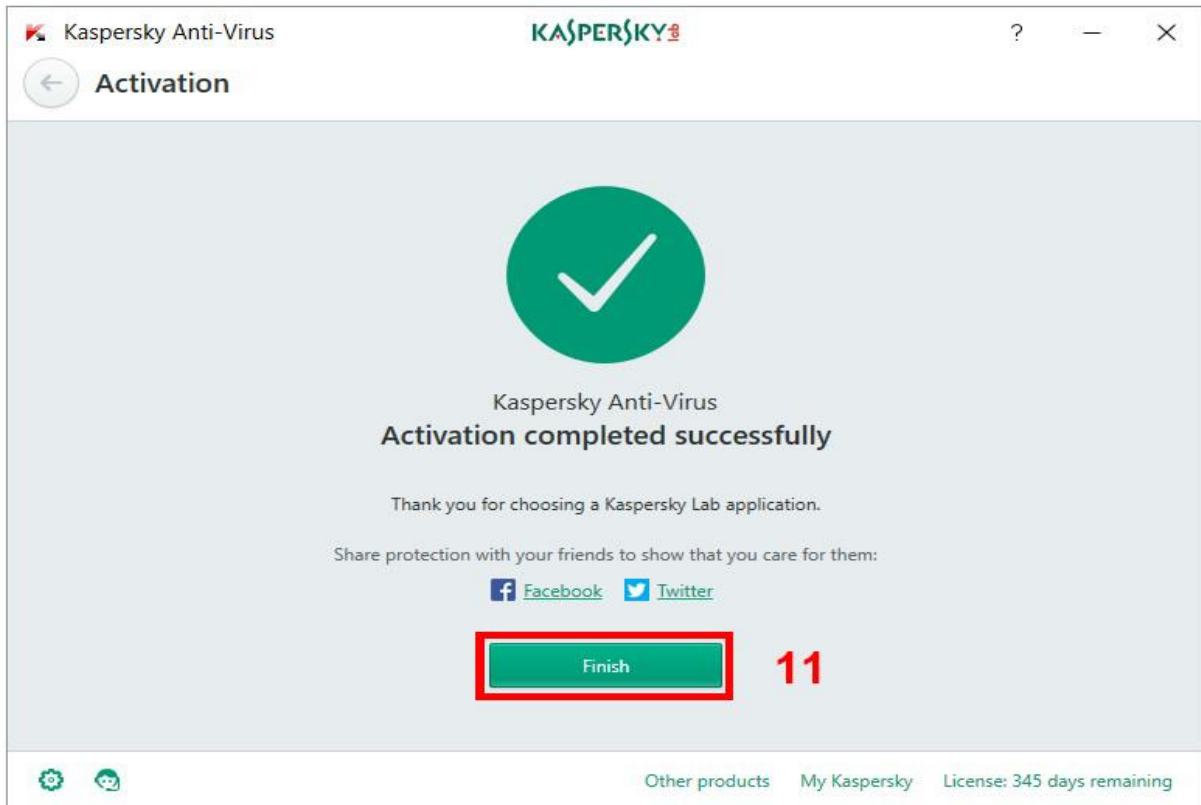

9. You can take a tour through the app features by clicking continue. Or **Skip** it.

10. Enter the activation code into the field in the **Activation** window. Click **Activate**.

11. Wait until the **Activation completed successfully** window appears and click **Finish**.

12. Once the installation is complete, the main Kaspersky window will appear then **Click Database Update**
